Great help resolving an assignment question

I was working on one of the module assignments and was stuck on one task. So I reached out to the support team and Rohit from Intellipaate reached out to me via text and sent me a zoom meeting call for us to go over the issue and resolve it. He was very nice and patient with me, he went through the task one step at a time to see where the error was. He even remotely connected to my laptop to help further with the issue. He then figured out what the issue was and I corrected it on my end while he watched to make sure I did everything correctly!
